EDUCATION

Georgetown University

B.S. in Science, Technology & International Affairs | Minor in Computer Science | GPA: 3.9/4.0

Washington, DC

Aug. 2024 – May 2028

- **Coursework:** Data Structures, Data Science, Cybersecurity, Probability & Statistics, Business Accounting & Finance, Cognitive Psychology
- **Awards:** Georgetown Product Space Hackathon (1st of 15 teams – AI Meal Planner) | NYU PMC Case Competition (2nd of 8 teams – AI Slack Dashboard, \$500), First Honors, Honors Certificate in International Business Diplomacy

PROFESSIONAL EXPERIENCE

The Massive Data Institute

AI Product & Data Policy Researcher

Washington, DC

Apr. 2026 – Present

- Guided funding for a \$26M grant for K-12 AI infrastructure by auditing 143 tools on adoption, safety, and compliance
- Designed a request for proposal to get 12+ open education resources into AI products by turning a diffusion framework into 3 phases
- Identified Census privacy risks by mapping 120+ data flows, delivering technical presentations to 300+ stakeholders at 3 conferences

Garde-Robe

Product Manager Intern

Washington, DC

Aug. 2025 – May 2026

- Increased click-through rate and adoption of 5 features by 20% by leading end-to-end development of interactive in-app tutorials
- Accelerated organic user growth by 15% by designing and shipping a 3-tier referral loop that gates premium features
- Lifted user activation 11% from onboarding by removing forced contact permissions and shipping an intro 3-step product tour
- Launched a resale feature across Poshmark, Depop, and eBay by cross-functionally collaborating with design and engineering on Figma
- Grew user signups 60% across launch campuses by leading entrepreneurial outreach and ambassador programs at 7 U.S. universities

U.S. House of Representatives

Legislative Intern – Office of Rep. Kevin Kiley

Washington, DC

Jan. 2026 – May 2026

- Reduced fraud exposure across \$8B in childcare funding by mapping 4 grant compliance frameworks into a federal bill
- Guided data privacy priorities by synthesizing 150+ weekly CRM constituent data points via keyword tracking into trend reports
- Drove bipartisan alignment of H.R. 6402 by evaluating trade-offs across 12 competing governance frameworks for the Congressman
- Cut White House tour-request tracking time by 80% by automating intake via a custom workflow for 15+ weekly requests

ADDITIONAL EXPERIENCE

MatchPoint

Founder & Product Manager

Washington, DC

July 2026 – Present

- Launched MatchPoint to grow Georgetown court-booking signups to 45+ users by scoping user needs via 33 interviews
- Architected a booking engine to resolve conflicts across 8 court zones and 4 sports by modeling a student-verified access system
- Developed an AI-powered matching algorithm using student skill and availability profiles to raise match fill to 50%
- Shipped a full-stack MVP live on Vercel to drive 5+ weekly court reservations with Next.js and Supabase

Hoyalitics

Chief Consulting Officer, previous Director of Training

Washington, DC

Aug. 2024 – Present

- Founded the applicant evaluation process by designing a 2-stage behavioral and technical interview to evaluate 400+ candidates
- Designed and taught a 4-module technical curriculum (Python, Tableau, SQL, Excel), certifying 300+ analysts for project placement
- Built and scaled a cross-division training pipeline, delivering 15 peer-led sessions to 100+ members by recruiting member-instructors
- Spearheaded client outreach and operations across 11 concurrent engagements with 90+ analysts by directing 13 project managers

Toast, Inc.

Product Consultant (Contract)

Washington, DC

Jul. 2025 – Dec. 2025

- Defined market and user requirements for a menu-discovery feature by leading user research across 50 responses to map 5 personas
- Prioritized navigation features across 11 industry peers by building a competitive feature matrix and presenting to the senior PM
- Cut menu review time by 30% across 45+ user validation tests by prototyping a menu-filtering feature (e.g., price, allergies) in Figma
- Established an AI discovery strategy by applying AI/ML concepts across 4 LLMs to recommend embedded reviews and an AI FAQ
